About the Author vi

Preface xiii

1 Electrostatics – I 1

- 1.1 Introduction 1
 - 1.1.1 Interrelationship between Electric and Magnetic Field 2
 - 1.1.2 Mathematics as a Language 3
- 1.2 Sources and Effects of Electromagnetic Fields 3
 - 1.2.1 Effects of Mobile Phone 8
 - 1.2.2 Electromagnetic Interference (EMI) 9
 - 1.2.3 Electromagnetic Compatibility (EMC) Requirements 9
 - 1.2.4 Methods to Prevent Electromagnetic Interference and Achieve Electromagnetic Compatibility 9
 - 1.2.5 Grounding; Shielding; and Filtering 10
- 1.3 Coordinate Transformation 10
 - 1.3.1 Coordinate System 10
 - 1.3.2 Cylindrical Coordinate System 11
 - 1.3.3 Spherical Coordinate System 14
- 1.4 Introduction to Scalar and Vector 16
 - 1.4.1 Scalar and Vector Field 18
 - 1.4.2 Vector Field 18
 - 1.4.3 Physical Meaning of Divergence and Curl 18
- 1.5 Gradient, Divergence and Curl 22
 - 1.5.1 Gradient 22
 - 1.5.2 Divergence 24
 - 1.5.3 Curl of a Vector V : ($\text{curl } V$) 26
- 1.6 Theorems and Applications 28
 - 1.6.1 Stokes's Theorem 28
 - 1.6.2 Stokes's Theorem – Additional Explanation 30
 - 1.6.3 Divergence Theorem 30
- 1.7 Coulomb's Law 32
- 1.8 Electric Field Intensity 32
 - 1.8.1 Line Charge 33
 - 1.8.2 Circular Line Charge 35

1.8.3	Circular Sheet Charge, at a Point Along the Axis	36
1.9	Proof for Gauss's Law	37
1.9.1	Proof of Gauss's Law	38
1.9.2	Algorithm for Solving Problem Using Gauss's Laws	39
1.9.3	Infinite Line Charge	39
1.9.4	Infinite Surface Charge	40
1.9.5	Volume Charge	40
1.10	Additional Topics	41
1.10.1	Vector Algebra	41
1.10.2	Conservative Field	43
	Problem set I	44
	University Questions	48
2	Electrostatics – II	55
2.1	Electric Potential	55
2.1.1	Potential due to Point Charge	56
2.1.2	Infinite Line Charge, ρ_L	56
2.1.3	Infinite Surface Charge ρ_s	57
2.1.4	Important Property of Electric Potential	57
2.2	Electric Field and Equipotential Plots	58
2.2.1	Condition for a Field to be Conservative or Irrotational	59
2.2.2	Relation between E and V	59
2.2.3	Electric Flux Lines and Equipotential Surface	60
2.3	Conductor and Dielectric	61
2.4	Electric Field in Conductor	61
2.4.1	Electric Field in Conductors	62
2.5	Dielectric Polarization	63
2.5.1	Electric Dipole	64
2.5.2	Electric Field Intensity "E" for a Dipole	66
2.6	Types of Current	67
2.6.1	Convection Current	67
2.6.2	Conduction Current	68
2.6.3	Displacement Current	68
2.6.4	Dielectrics	69
2.7	Poisson's & Laplace's Equation	70
2.8	Capacitance	71
2.8.1	Parallel Plate Capacitor	71
2.8.2	Parallel Plate Capacitor	72
2.8.3	Parallel Plate Capacitor with 2 Dielectrics	72
2.8.4	Self Capacitance of a Sphere	74
2.8.5	Concentric Charged Sphere	74
2.8.6	Co-axial Cables (Cylinder)	75
2.8.7	Transmission Line	75
2.8.8	Algorithm to Find Capacitance "C"	77

2.9	Series and Parallel Combination of Capacitance	77
2.9.1	Series Capacitors	77
2.9.2	Parallel Capacitors	77
2.10	Electrostatic Energy	78
2.11	Boundary Conditions	80
2.11.1	Derivation	82
2.11.2	Problems on Boundary Conditions	83
2.12	Additional Topics	86
2.12.1	Properties of Electric Flux Lines	86
2.12.2	Continuity Equation and Relaxation Time	87
2.12.3	Resistance of a Conductor	90
2.12.4	Solution of Laplace's Equation	91
2.12.5	Method of Images	92
2.12.5.1	Method of Images for a Point Charge	93
2.12.5.2	Conducting Sphere	93
2.12.5.3	Capacitance of a Transmission Line Including Earth Effect	95
	University Question	99
	Question Bank	102
3	Magnetostatics	105
3.1	Introduction	105
3.2	Magnetic Field	105
3.2.1	Magnetic Flux (ϕ)	106
3.3	Magnetic Force on a Charge	106
3.3.1	Electric Force on a Charge	106
3.3.2	Force on a Current Element	107
3.4	Biot-Savart's Law	107
	Problem on Lorentz Equation	108
3.5	Magnetic Field Mapping for Various Configurations	110
3.6	Ampere's Law	112
3.6.1	Application of Ampere's Law	112
3.6.1.1	Infinite Line Current	112
3.6.1.2	Infinite Sheet Current	113
3.6.1.3	Infinitely Long Coaxial Transmission Line	114
3.6.1.4	Toroid-H along the Center of Toroid	115
3.7	Magnetic Field Intensity for Different Configurations	116
3.7.1	Magnetic Field "H" for a Straight Conductor	116
3.7.1.1	Force between Two Parallel Conductors	118
3.7.2	A Circular Current Carrying Conductor	119
3.7.3	At Any Point on the Axis of the Solenoid	122
3.7.4	Magnetic Field at the Centre of Toroidal Coil	123
3.8	Torque	124
3.9	Magnetic potential	125
3.9.1	Magnetic Scalar Potential	125

- 3.9.1.1 Laplace's Equation is Satisfied by Magnetic Scalar Potential **125**
- 3.9.2 Magnetic Vector Potential **126**
- 3.9.3 Problem on Magnetic Potential **127**
- 3.9.4 Properties of Fields **128**
- 3.10 Important Terms in Magnetostatics **128**
 - 3.10.1 Magnetic Dipole **128**
 - 3.10.2 Magnetization **129**
 - 3.10.3 Magnetic Susceptibility **129**
- 3.11 Magnetization in Material **130**
 - 3.11.1 Classification of Magnetic Materials **130**
 - 3.11.1.1 Diamagnetism **131**
 - 3.11.1.2 Paramagnetism **131**
 - 3.11.1.3 Ferromagnetism **131**
- 3.12 Boundary Conditions for Magnetic Field **132**
- 3.13 Inductance **133**
 - 3.13.1 Solenoid **134**
 - 3.13.2 Toroid **134**
 - 3.13.3 Self-Inductance of Co-axial Cable **135**
 - 3.13.4 Inductance of a Solid Inner Conductor **136**
 - 3.13.5 Inductance of Two Transmission Line **137**
- 3.14 Energy Stored in Magnetic Field **138**
 - 3.14.1 Energy Density **139**
- 3.15 Magnetic Circuit **139**
 - 3.15.1 Analogy between Electric and Magnetic Circuit **140**
- 3.16 Additional Topics **141**
 - 3.16.1 Magnetic Flux Lines or Magnetic Lines of Force **141**
 - 3.16.2 Why Magnetic Field "H" is a Non-Conservative Field **143**
 - 3.16.3 Vector Cross Product **144**
- University Questions **146**
- 4 Electrodynamic Fields 147**
 - 4.1 Magnetic Circuits **147**
 - 4.1.1 Core with Air-gap **149**
 - 4.1.2 Fringing **150**
 - 4.2 Faraday's Law **154**
 - 4.2.1 Explanation of Lenz's Law **154**
 - 4.3 Introduction to Maxwell's Equations **155**
 - 4.4 Transformer Emf (Static Emf) and Motional Emf (DC Generator) **156**
 - 4.4.1 Transformer Emf (Time Varying "B"; Stationary Loop) **156**
 - 4.4.2 Motional Emf (DC Generator) **157**
 - 4.4.3 Transformer and Motional Emf **158**
 - 4.4.3.1 Fleming's Left Hand Rule **159**
 - 4.4.3.2 Fleming's Right Hand Rule **159**
 - 4.4.4 DC Generator (Motional emf) **159**

4.4.5	DC Motor	160
4.4.6	Moving Loop in Static Magnetic Field (DC Generator Type, Motional emf, Flux-Cutting emf)	161
4.5	Maxwell's Equation in Phasor Form	162
4.5.1	Proof for Phasor Form of Maxwell's Equation	162
4.5.2	Derivation of Maxwell's Equations	163
4.5.3	Comparison between Circuit Theory and Electromagnetic Theory	167
4.6	Additional Topics	167
4.6.1	Force-Stress-Strain-Displacement Relationship	168
4.6.2	Constitutive Equations	168
4.6.3	Compatibility Equation	169
	University Questions	170
	Question Bank	170
5	Electromagnetic Waves	171
5.1	Wave	171
5.1.1	Longitudinal Wave and Transverse Wave	171
5.1.2	Plane Wave: Electromagnetic Waves are Transverse Waves	172
5.2	Electromagnetic Wave Generation	172
5.2.1	EM Wave Generation by Electric Dipole Antenna	175
5.2.2	Polarization of Electromagnetic Wave	176
5.3	Electromagnetic Wave Equation Derived from Maxwell's Equations (from Faraday's Law)	176
5.3.1	Wave Equation for Magnetic Field	177
5.3.2	Wave Equation for Dielectric	178
5.3.3	Wave Propagation in Conducting Medium	179
5.4	Wave Propagation in a Lossless Medium or Wave Propagation in Free Space or Dielectric	181
5.4.1	Wave Propagating in a Conductor/Conducting Medium	183
5.4.2	II Approach	184
5.5	Wave Parameter in a Good Dielectric	185
5.5.1	Wave Parameter in a Good Conductor	187
5.6	Skin Effect	188
5.6.1	Skin Effect	194
5.6.2	Skin Effect in a slab	196
5.7	Transmission Lines	199
5.8	Poynting Vector and Poynting Theorem	203
5.8.1	Poynting Vector – Instantaneous Power, Average Power, Complex Power	205
5.9	Reflection of Plane Wave at Normal Incidence	206
5.9.1	Oblique Incidence on a Plane Boundary	212
5.10	Additional Topics	219
5.10.1	Electromagnetic Boundary Condition	219
5.10.2	Poynting Vector	219
	Question Bank	221
